# Is your bank drinking your profits?

## Finance Review and Audit

How much of the recent RBA rate reductions has your bank passed on to you?

The answer is probably very little!

In the current volatile finance market, banks have been very slow in passing on savings to their business customers.

There has never been a more important time to take check of your banking requirements and ensure that you are getting the best possible deal.

One of the main services Perks Finance offers our clients is Finance Audit and Advice.

Even if you are not looking to borrow additional funds or wishing to change your current bank, we may be able to assist you to save money.

If you are not sure if you are obtaining the best possible deal from your bank, we would be pleased to assess your current banking arrangements. We can either find an alternate financier for you, or negotiate on your behalf to get a better deal from your existing bank.

Ask yourself:

- Does my bank really need all this security?
- Do I have to provide a personal guarantee?
- The bank also has my house as security but I'm still paying business rates and hit with fees and charges, is there a better way?
- Can I get a better margin on my business loans?

At Perks Finance we have the answers!

Of course if you are looking to borrow additional funds for your hotel, be it renovations, gaming upgrades, new plasma screens or any other purpose Perks Finance can assist.
